

Industrial Stormwater Operator Training

REGISTRATION FORM

The purpose of this course is to provide an understanding of the changing regulations and standards implemented by the Washington State Department of Ecology (Ecology) in recent years regarding Stormwater Treatment. Our instructor, John W. Macpherson, is a *Certified Professional in Erosion and Sediment Control* by EnviroCert International. This class is offered for training compliance with Chapter 173-240 of the WAC for Submission of Plans and Reports for Construction of Wastewater Facilities. This class represents eight (8) hours of class room instruction toward obtaining an Industrial Stormwater Certification.

Course Instruction Topics:

1. Introduction
2. Basic understanding of stormwater regulations (EPA & Ecology).
3. Basic understanding of stormwater collection.
4. Basic understanding of stormwater quality and testing procedures.
5. Basic understanding of parameters for your region / locale and your company's discharge permit.
6. Basic understanding of how to start-up, operate, maintain, and shut-down your companies stormwater treatment system.
7. Basic understanding of stormwater discharge regulations and permits for applicable region/locale.

Completion of this course will earn participants an *Industrial Stormwater Operator Certification* that will last for two (2) years. (NOTE: Lunch is not provided.)
